

New FM Library Database

(design considerations)

As of 3/17/10

Spoke with: Joe, TC, Taylor, Dan, Mark, Rob, Ken, and Thom

Active Users: Joe, Dan, Taylor, TC

Wishlist:

-Make it so that value can be the same for all of the songs (e.g same composer /performer for the entire disk, to save time)

-Allow partial name searches (e.g. an* when looking for An American in Paris)

Phase II: pull as much as possible from the Internet databases that the CD ripping software uses

Fields:

Genre (get list of these- try to generate in PHP/HTML vs. doing a separate table)

Format (CD, Album, Reel to Reel etc – get accurate list)

Multidisk?

Catalog #

Track #

Track Name

Track Length

Performer/Artist

Composer

Tags (for themes- e.g. birds because it mentions a swan or bassoon b/c it features bassoon)
